

Hijazi & Ghosheh Group

Hijazi & Ghosheh is a group of 46 companies; it was one of the first in the 1980's to distribute different kinds of meat, white and red along with frozen fish that had high quality and reasonable prices.

Mr. Nidal Awartany
Group IT Manager
2012 - till present

"By implementing Microsoft Dynamics AX our company has gained the control and accuracy in the data which were missing before, we had a huge amount of work, due to our company's size, the possibility of having errors was very high, but after the implementation all of that has changed and work became so much easier, now we can easily reach the accurate data, detect any problems and make fast and easy decisions, more importantly we have the control over the work, thanks to Microsoft's user friendly applications and Sermon's services and affordable prices."

The Sermon Experience

"My journey with Sermon started in 2008, in one of my previous experiences. Before I joined Hijazi & Ghosheh, I was working with a company that desperately needed ERP implementation and we chose Sermon Business Solutions out of three other companies due to their high levels of competency, consistency and commitment, not to mention that customers' satisfaction is Sermon's number one goal. I'm proud to say that today Sermon is delivering the same standards at Hijazi & Ghosheh."
